

Deep Connections

A talk by Martin Redfern

Two big ideas in 40 minutes: The depth of geological time, which makes almost all things possible, and the incredible interconnectedness of everything from the nature of the universe to the trees in a forest.

8pm on Monday 24th June 2019 at the Reynolds Room, Knighton Community Centre, Bowling Green Lane, Knighton, LD7 1DR

Free event - donations welcome.

Martin Redfern is a lapsed geologist turned radio producer who loves our natural world. After 37 exciting years as a science producer at BBC Radio, he has moved to the Radnorshire Hills to pursue several freelance projects and look after 22 acres of woodland, fields and garden.

The talk will be preceded by the Knighton Tree Allotments Trust's AGM. Come and see how we engage in sustainable woodland management for the benefit of local people. We protect and enhance wildlife whilst generating woodland products such as firewood and timber for our members.
